

Canine Genetic Health CertificateTM

Call Name: Jagger
Registered Name: Coronado's Rockin Jagger
Breed: Australian Shepherd
Sex: Male
DOB: Aug. 2013

Laboratory #: 10959
Registration #: DN37496701
Microchip #: 985112005732821
Certificate Date: May 26, 2015

This canine's DNA showed the following genotype(s):

Disease	Gene	Genotype	Interpretation
Progressive retinal atrophy, Progressive rod-cone degeneration	<i>PRCD</i>	WT/WT	Normal

WT, wild type (normal); M, mutant

Paw Print GeneticsTM performed the tests listed on this dog. See the Laboratory Report for interpretation and recommendations based on these findings. The genes/diseases reported here were selected by the client. Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. These tests were developed and their performance determined by Paw Print Genetics. This laboratory has established and verified the tests' accuracy and precision. Because all tests performed are DNA-based, rare genomic variations may interfere with the performance of some tests producing false results. If you think these results are in error, please contact the laboratory immediately for further evaluation. Genetic counseling is available at Paw Print Genetics.
